
INTRODUCTION

TECH STACK

Full-Stack Application

The dashboard uses a full-stack approach combining frontend, backend, and database technologies for comprehensive data analysis.

Modern Tech Stack

Technologies used include React for frontend, Node.js for backend, and MySQL Database for efficient data storage.

User-Centric Design

The dashboard features a professional design focused on ease of use and high functionality for business users.

Seamless Data Integration

Integration with Genesys Cloud APIs ensures accurate historical and real-time acoustic data retrieval and visualization.
